Since the 1960's, Sesame Street has been a household name with both parents and kids alike. And even up to now, most people are still familiar with the cast of Sesame Street. One of the most endearing Sesame Street character is Elmo, or the little red monster everyone loves.

After the popular release of the Tickle-Me Elmo, Sesame Street Let's Rock Elmo was the next to arrive in stores. In Let's Rock Elmo, the popular stuffed toy is a one-man band. He comes with a microphone, tambourine, and a drum set. You can even purchase the guitar and keyboard to complete Elmo's one-man band! The best part about this is the kids can join his band and play the other instruments while Elmo rocks the other instruments and the microphone.

It's rock out time with Elmo! He is dressed in a concert tee and comes with a microphone, tambourine, and drums. Kids can play along, too.

Elmo can sing 6 different songs and he surprisingly can detect whether he's supposed to play with the drums, or any other instrument. His mouth also moves as he speaks and sings, and in addition, his arms can move up and down when he's playing the instruments.

Sesame Street Let's Rock Elmo is rated by users online with a very high 4.5 out of 5 stars. Parents and children alike who are big fans of the lovable red Muppet simply adore this new interactive Elmo.

A mother fell completely in love and so did her three-year old, who is likewise a big fan. She also noted that Sesame Street Let's Rock Elmo is a very safe toy for children to play because there aren't any choking hazards for small children.

Most negative feedback towards Sesame Street Let's Rock Elmo were all minor issues.
